

NICOLINA LARSSON

FRONT END DEVELOPER

(WITH A BACKGROUND IN BACK END)

As a passionate front end developer, I specialize in modular development, focusing on creating reactive and digitally accessible UI components. My expertise lies in leveraging design systems to craft intuitive and accessible interfaces. My journey in the tech world began with a bachelors degree at EduGrade, where I honed my skills in back end/Java with a focus on object-oriented programming, REST APIs, and databases. This foundation was crucial in my transition to modern web technologies including React, TypeScript, Next.js and Apollo GraphQL.

SKILLS

LANGUAGES

JavaScript
TypeScript
HTML
CSS
Java
GraphQL

UX/UI TOOLS

Figma

DEV TOOLS

Storybook
Postman
Azure DevOps

FRAMEWORKS

Next.js
Tailwind CSS

LIBRARIES

React

My professional experience is marked by a deep commitment to agile methodologies, particularly Scrum, which I believe are essential for fostering innovation and collaboration within a team. I've had the privilege of working closely with designers, developers, and product owners to ensure our solutions are not only innovative but also aligned with industry standards. My contributions to Youwe Agency's Headless Accelerator project are a testament to my dedication to rigorous testing, component development, and integration with design systems to deliver visually appealing, technically sound, accessible, and user-friendly solutions.

EXPERIENCE

• Youwe Agency

Front End Designer,
Stockholm, Sweden
Oktober 2023 - April 2024

• Edugrade

Higher Vocational education
Agile Java Developer,
Remote studies
September 2022 - May 2024

I am a curious and creative with a big passion for programming and I thrive in collaborative environments where teamwork and mutual support are key.

I am always eager to explore new technologies and methodologies, driven by a desire to push the boundaries of what's possible in web development. My goal is to continue contributing to projects that challenge me, inspire me and ultimately make a positive impact on users and the industry.
